AHALYA KUMAR

PRODUCT MANAGER: AI FOR SOCIAL GOOD

Pune, India | +91-8184917556 | ahalyakumar20@outlook.com | ahalyakumar.github.io

PROFESSIONAL SUMMARY

AI-focused Product Manager with 4+ years building and scaling healthcare AI products, including founding and leading an AI/ML team from the ground up. Proven track record raising international funding, managing multi-institutional research partnerships (Oxford, AIIMS, Mayo Clinic), and driving AI products from research and clinical validation to production, currently serving 3,000+ clinicians nationwide.

EXPERIENCE

Product Manager: *Doto Health (IIT Bombay Incubated)* **07/2024 – Present**

AI-focused startup building products to improve maternal and child health outcomes

- **Founded and lead the AI/ML team from the ground up**: the organization's first machine learning function, responsible for a preterm birth prediction model built on retrospective clinical corpus data, with an asphyxia risk-detection model currently in development.
- **Engineered a digitized uterine contraction monitoring algorithm**, now in production and used by 3,000+ Obstetricians and Gynecologists across the country.
- **Led product discovery, market research, and go-to-market strategy for 'Nurtura'**, an AI-powered co-pilot for birthing, driving its successful launch.
- **Raised $100,000 USD in funding** through UNICEF's FemTech Ventures program and represented Doto Health at the program's showcase in South Africa.
- **Lead all technical partnerships**, including THSTI, AIIMS Nagpur, St. John's Research Institute, and the University of Oxford, spanning research, clinical validation, and product co-development; initiated and manage the Mayo Clinic engagement.
- **Own grant writing for AI and research initiatives**, translating technical R&D into funded proposals.
- **Designed and deployed digital referral workflows** for last-mile maternal health delivery (public health use case of the Nurtura co-pilot product).
- **Led design research and clinical validation processes** to translate user needs and clinical evidence into product and R&D decisions.
- **Built organization-level KPI dashboards** and drove cross-functional collaboration across product, operations, and sales teams.
- **Work within the R&D wing (stealth mode)**, translating early-stage research hypotheses into product concepts.

Product Analyst: *Wadhwani AI* **11/2022 – 06/2024**

Non-profit applied AI research organization building for social impact

- **Developed a clinical decision-support app for TB diagnosis** using chest X-ray screening for medical practitioners.
- **Built multiple AI MVPs across various healthcare use cases and AI interventions**, prioritizing peripheral and underserved users to ensure high-quality care delivery.
- **Designed an AI-based cancer detection product** using computer vision methodologies.
- **Proposed and presented a reusable image-based ML platform** to streamline development across AI products.
- **Curated and presented the organization's product portfolio** at the G20 Health Working Group summit.
- **Conducted on-site user research** with product beneficiaries and implemented data pipeline processes to complete the AI lifecycle loop.
- Developed partner-level operating procedures to address emerging public health challenges.
- **Built applications and technology interventions in collaboration with policymakers** to align product design with public health policy priorities.

Product Business Analyst: *Tezo* **08/2021 – 10/2022**

Digital transformation organization

- Led collaborative product and feature planning sessions with business stakeholders to gather and document requirements.
- Ran A/B testing on product mockups in partnership with business stakeholders.
- Authored user stories, Functional Specification Documents (FSDs), and Business Requirement Documents (BRDs).

- Monitored project health and scope to ensure on-time, in-scope delivery.

Product Business Analyst: *Oorwin* **05/2021 – 07/2021**

Product-led HR technology company

- Integrated third-party applications into the core product.
- Managed customer change requests and translated them into mockups for the development team.

SKILLS

AI/ML & Technical: AI product development, MVP via vibe coding and AI evals

Product: Product Strategy, 0→1 Product Development, Design Research, Figma (Mockups & Prototyping), Bolt.ai, Tableau (KPI Dashboards), Jira/Asana

Domain: Maternal & Neonatal Health, Digital Health / HealthTech, Clinical Research Partnerships, AI for Social Good

Leadership & Strategy: Team Building & Leadership, Grant Writing & Fundraising, Technical Partnership Management, Stakeholder Management, Cross-functional Collaboration

EDUCATION

Bachelor of Technology, Mechanical Engineering: VIT University 2017 – 2021

ADDITIONAL

- Research Fellowship, Tata Institute of Fundamental Research (TIFR)
